EDUCATION

NMIMS, Shirpur

B.Tech, Computer Science — CGPA: 8.27 / 10.0

2024 – 2028

Shirpur, MH, India

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL

Backend & Systems: Node.js, FastAPI, Django, Spring Boot, Express.js, Prisma ORM, Redis, REST APIs

Databases & DevOps: PostgreSQL, MySQL, Docker, Git, Linux, JWT, RBAC, Indexing & Normalization

AI / ML & Frontend: Scikit-Learn, NumPy, Pandas, NLP — React.js, Next.js, Angular, Three.js, Tailwind CSS

EXPERIENCE

Ouranos Robotics Pvt. Ltd.

June 2026 – Present

Web Development Intern

Remote

- Building responsive Agri-IoT product interfaces using production-grade frameworks and scalable API-driven architectures.
- Shipping high-throughput features across iterative CI/CD deployment pipelines through cross-functional collaboration.

Third Essentials

May 2026 – Present

Software Engineering Intern

On-site

- Refactored core full-stack modules to eliminate critical rendering bottlenecks, measurably reducing client-side response latency.
- Architected modular component systems with secure RESTful API integrations, improving data flow across distributed service layers.
- Optimised PostgreSQL indexing and query execution plans to minimise transactional latency under high-concurrency traffic.

PROJECTS

Tech Island | Next.js, TypeScript, PostgreSQL, Prisma, Node.js

Gamified Competitive Coding Platform

- Architected a distributed competitive coding platform with real-time concurrent gameplay, interactive 3D UI, and backend infrastructure capable of serving thousands of simultaneous users.
- Built a server-side sandboxed code execution engine with Monaco Editor integration for automated multi-language grading using secure process isolation.

ShopSphere | Java, Spring Boot, MySQL, Hibernate, JWT

Multi-Role E-Commerce Platform

- Engineered a production-grade multi-role e-commerce system with granular RBAC and real-time inventory/order state synchronisation across concurrent transactional workloads.
- Designed high-performance RESTful APIs with optimised SQL and Hibernate queries to support scalable vendor, admin, and consumer operations.

Resume Alchemist | FastAPI, Python, NLP, Docker

AI-Powered Profile Analysis

- Developed an AI-driven skill extraction and gap analysis engine using NLP, containerised as a Docker microservice ecosystem for portable, reproducible deployment.

Aura AI | Python, Scikit-Learn, FastAPI

Automated ML Pipeline — 24-Hr Hackathon

- Built an end-to-end automated ML pipeline with hyperparameter optimisation; deployed a high-throughput asynchronous inference API via FastAPI.

LEADERSHIP & ACTIVITIES

Convener — Ambiora Tech Fest, NMIMS

2024

- Directed end-to-end strategic planning, technical logistics, and cross-team coordination for the national technical festival.

Lead — Coding Club · Technical Committee Member, LearnTech Club, NMIMS

2024 – Present

- Organised hackathons, mentored peers on data structures and backend architecture; delivered algorithmic thinking workshops to 100+ students.

CERTIFICATIONS & ACHIEVEMENTS

Data Structures & Algorithms using Java — NPTEL Elite Certification, **National Top 5% Rank**
